

Introduction

1

Markets

2

Metallurgical Fundamentals of Ductile Iron

3

Selecting Chemical Composition

4

Engineering Properties

5

Melting and Base Iron Preparation

6

Magnesium Treatment

7

Inoculation

8

Moulding Methods and Materials

9

Risering Ductile Iron Castings

10

Gating Systems

11

Pouring, Shake-Out and Finishing Operations

12

Quality Control

13

Heat Treatment of Ductile Iron

14

Defects in Ductile Iron Castings

15

Welding Ductile Iron

16

Machinability of Ductile Iron Castings

17

Compacted Graphite Iron

18

Applications

19

TABLE OF CONTENTS

	Page No.		Page No.
1. INTRODUCTION	1	6.2 CHARGE MATERIALS	56
2. MARKETS	3	6.2.1 Sorelmetal.....	56
3. METALLURGICAL FUNDAMENTALS		6.2.2 Steel Scrap	58
OF DUCTILE IRON	7	6.2.3 Ductile Iron Returns.....	59
3.1 THE SOLIDIFICATION OF DUCTILE IRON	7	6.2.4 Recarburizers	59
3.1.1 Hypoeutectic Freezing.....	9	6.2.5 Silicon Carbide	60
3.1.2 Hypereutectic Freezing.....	9	6.2.6 Ferroalloys and Other Additions	61
3.1.3 Nucleation and Growth of Graphite in Ductile Iron.....	10	6.3 PRECONDITIONING.....	61
3.2 VOLUME CHANGES INVOLVED IN THE COOLING AND FREEZING OF DUCTILE IRONS	12	7. MAGNESIUM TREATMENT	63
3.3 METALLURGICAL QUALITY.....	13	7.1 A BRIEF HISTORY	63
3.3.1 Major Foundry Variables Affecting Metallurgical Quality	14	7.2 THE PROBLEMS OF ADDING MAGNESIUM TO MOLTEN IRON.....	63
3.3.2 Nucleation Potential and Volume Changes	14	7.3 NODULARIZATION METHODS FOR THE PRODUCTION OF DUCTILE IRON CASTINGS.....	63
3.4 HEREDITY, A CONCEPT TO BE ACTUALIZED	16	7.3.1 Ladle Treatments.....	63
3.5 INOCULATION AND CARBIDE FORMATION	17	7.3.2 Pure Mg Treatments.....	66
3.6 THE MATRIX AND SOLID STATE TRANSFORMATIONS	18	7.3.3 In-Mould and Other Treatment Chamber Systems (Flotret, etc.).....	67
3.6.1 Role of Nodule Count and Size in Determining Matrix Structure	19	7.3.4 Cored Wire Treatments.....	69
3.6.2 Other Possible Matrix Structures in Ductile Iron	19	7.3.5 Other Methods (Vortex, Ductilater, Injectafill, Flexipor)	70
4. SELECTING CHEMICAL COMPOSITION.....	23	7.4 NODULARIZERS AND MAGNESIUM TREATMENT ALLOYS.....	70
4.1 THE PRIMARY ELEMENTS IN DUCTILE IRON	23	8. INOCULATION	73
4.1.1 Carbon and Silicon	23	8.1 WHAT IS INOCULATION? WHY IS IT NECESSARY?	73
4.1.2 Manganese	26	8.2 INOCULATION METHODS	75
4.1.3 Sulphur	27	8.3 COMPOSITION AND PARTICLE SIZING OF INOCULANT MATERIALS.....	77
4.1.4 Phosphorus.....	28	8.4 AMOUNT OF INOCULANT	78
4.2 SPHEROIDIZING (NODULARIZING) ELEMENTS	29	8.5 BASE METAL COMPOSITION AND PREPARATION	78
4.2.1 Magnesium	29	9. MOULDING METHODS AND MATERIALS.....	81
4.2.2 Cerium and Rare Earth (RE) Elements.....	30	9.1 GENERALITIES.....	81
4.3 ALLOYING DUCTILE IRONS.....	31	9.2 SAND CHARACTERISTICS.....	81
4.3.1 Primary Elements	31	9.2.1 Purity of the Sand.....	81
4.3.2 Copper.....	31	9.2.2 Grain Shape and Grain Size	81
4.3.3 Tin.....	32	9.3 GREEN SAND AND BINDERS/ADDITIVES	82
4.3.4 Molybdenum	32	9.3.1 Compactability Control	82
4.3.5 Nickel.....	33	9.3.2 Other Sand Tests and Properties	83
4.3.6 Summary – Alloying Elements.....	34	9.4 SELF SETTING MOULDING PROCESS.....	84
4.4 CARBIDE PROMOTING ELEMENTS.....	34	9.5 PATTERN SHRINKAGE	84
4.5 SUBVERSIVE (GRAPHITE SHAPE DETERIORATING) ELEMENTS.....	36	10. RISERING DUCTILE IRON CASTINGS	85
4.6 SUMMARY – RESIDUAL ELEMENTS.....	37	10.1 THE COOLING OF A CASTING	85
5. ENGINEERING PROPERTIES	39	10.2 THE FREEZING OF DUCTILE IRON CASTINGS.....	86
5.1 FERRITIC-PEARLITIC GRADES	39	10.3 CONVENTIONAL RISERING.....	88
5.2 AUSTEMPERED DUCTILE IRONS.....	42	10.4 DIRECTLY APPLIED RISERING	89
5.3 ALLOYED DUCTILE IRONS	45	10.5 BOTTLE SHAPED (OR HEINE DESIGN) RISERS	94
6. MELTING AND BASE IRON PREPARATION	49	10.6 PRESSURE CONTROL RISERING.....	95
6.1 MELTING PROCESSES	49	10.7 RISERLESS DESIGN	98
6.1.1 Cupola Melting.....	49	10.8 SUMMARY OF RISERING TECHNIQUES	99
6.1.2 Development in Cupola Operation	50	10.9 RISER NECK	100
6.1.3 Desulphurization	52	10.10 CASTING WITH CHILLS.....	100
6.1.4 Desulphurization with Magnesium.....	54	10.11 RISERING AIDS	101
6.1.5 Induction Melting	54	10.12 SIMULATION OF CASTING SOLIDIFICATION	102
6.1.6 Arc Furnace Melting	55		
6.1.7 Rotary Furnace Melting	56		

	Page No.		Page No.
11. GATING SYSTEMS.....	105	16.4 CONSIDERATIONS REQUIRED FOR SUCCESSFUL WELDING OF DUCTILE IRON.....	146
11.1 GENERAL.....	105	17. MACHINABILITY OF DUCTILE IRON CASTINGS.....	149
11.2 THE PRINCIPLES OF DESIGNING A PRESSURIZED GATING SYSTEM.....	106	17.1 FUNDAMENTAL ASPECTS OF MACHINING DUCTILE IRON.....	149
11.3 GATING VERTICALLY PARTED MOULDS.....	107	17.2 DUCTILE IRON VS OTHER MATERIALS.....	152
11.4 GATING SYSTEM FOR THE "LOST FOAM PROCESS".....	108	17.3 MACHINING PARAMETERS.....	153
11.5 DEFECTS DUE TO IMPROPER GATING SYSTEM.....	108	18. COMPACTED GRAPHITE IRON.....	159
11.6 METAL FILTRATION.....	108	18.1 WHAT IS COMPACTED GRAPHITE IRON?.....	159
12. POURING, SHAKE-OUT AND FINISHING OPERATIONS	111	18.2 CHARACTERISTICS AND PROPERTIES OF CG IRONS.....	159
12.1 POURING AND POURING LADLES.....	111	18.3 CHEMICAL COMPOSITION.....	160
12.2 HEAT CONSERVATION.....	111	18.4 PRODUCTION.....	161
12.3 SHAKE-OUT TIME.....	112	18.4.1 Charge Materials.....	161
12.4 RISER REMOVAL.....	112	18.4.2 Melting.....	161
13. QUALITY CONTROL.....	115	18.4.3 Processing for Vermicular Graphite Formation.....	161
13.1 PERSONNEL TRAINING.....	115	18.4.4 Inoculation.....	163
13.2 SELECTION AND CONTROL OF CHARGE MATERIALS.....	115	18.4.5 Quality Control.....	163
13.3 BASE IRON CONTROL.....	116	18.5 APPLICATIONS.....	163
13.4 TREATED IRON CONTROL.....	118	19. APPLICATIONS.....	165
13.5 THERMAL ANALYSIS.....	118		
13.6 FINAL QUALITY CONTROL OF CASTINGS.....	119		
13.6.1 Ultrasonic Testing.....	119		
13.6.2 Eddy Current Testing.....	120		
13.6.3 Ball Hardness Testing.....	120		
13.6.4 Mechanical Testing.....	120		
14. HEAT TREATMENT OF DUCTILE IRON.....	123		
14.1 STRESS RELIEVING.....	123		
14.2 HEAT TREATMENTS MODIFYING STRUCTURE AND PROPERTIES.....	123		
14.3 HARDENABILITY AND TTT CURVES.....	124		
14.4 ANNEALING.....	125		
14.5 NORMALIZING.....	126		
14.6 HARDENING AND TEMPERING.....	126		
14.7 SURFACE HARDENING.....	127		
14.8 HEAT TREATMENT FOR AUSTENITIC DUCTILE IRONS.....	127		
14.9 AUSTEMPERED DUCTILE IRON (ADI).....	128		
15. DEFECTS IN DUCTILE IRON CASTINGS.....	131		
15.1 SAND RELATED DEFECTS.....	131		
15.2 GAS RELATED DEFECTS.....	131		
15.3 OTHER SURFACE INCLUSIONS.....	131		
15.3.1 Dross Inclusions.....	131		
15.3.2 Slag and Dirt.....	132		
15.4 SHRINKAGE.....	133		
15.5 GRAPHITE RELATED DEFECTS.....	134		
15.6 MATRIX RELATED DEFECTS.....	139		
15.6.1 Hard Spots (chill) and Carbides.....	139		
15.6.2 Ferrite Skin.....	140		
15.6.3 Ferrite / Pearlite Proportions.....	141		
15.7 DEFECTS IN DUCTILE IRON PIPES.....	141		
15.8 MISCELLANEOUS DEFECTS.....	141		
16. WELDING DUCTILE IRON.....	143		
16.1 WELDING.....	143		
16.2 ARC WELDING.....	143		
16.3 GAS WELDING.....	144		
16.3.1 Gas Fusion Welding.....	144		
16.3.2 Power Welding.....	144
